PROFESSIONAL SUMMARY

Detail-oriented Cybersecurity Analyst and Network Administrator with a strong foundation in Network Security (CCNA), Threat Management, and SIEM-based incident response. Expanding into Full-Stack Web Development through an intensive full-stack development training programme, gaining hands-on skills in HTML5, CSS3, JavaScript, and Tailwind CSS. Combines the analytical rigour of a Philosophy background with practical expertise in Python, Wireshark, and the NIST Cybersecurity Framework. Actively documenting a public learning journey (#BiP60) across LinkedIn, YouTube, and X. Seeking junior developer, junior cybersecurity analyst, or internship roles where both security instincts and web development skills create genuine value.

TECHNICAL SKILLS

Security Operations SIEM (Splunk), IDS (Snort), NIST CSF, Incident Response, Security Auditing

Networking TCP/IP, Switching & Routing, Packet Analysis (Wireshark), CCNA

Web Development HTML5, CSS3, Tailwind CSS, JavaScript (in progress), Python (in progress), Responsive Design, Git/GitHub

Systems & Tools Linux & Windows OS, Python, MySQL, VS Code

Compliance GDPR, HIPAA, PCI DSS

Soft Skills Written & Verbal Communication, Complex Problem Solving, Growth Mindset

WORK EXPERIENCE

Network Administrator — XulTechNG, Enugu

May 2025 – Present

- Monitor network performance using Wireshark packet analysis to proactively troubleshoot latency issues and outages, maintaining high system availability.
- Deploy cybersecurity best practices including firewall configurations and granular access controls to safeguard internal systems and sensitive data.
- Analyse TCP/IP traffic patterns to detect anomalies and potential unauthorised access attempts within the local network environment.

Retail Sales Manager — MITM Energy

September 2020 – July 2022

- Coordinated sales operations across multiple locations, managing team performance and client relationships to consistently meet revenue targets.
- Designed and implemented an Excel-based tracking system to manage sales records, inventory, and debtor accounts — demonstrating early data management instincts.

TECHNICAL PROJECTS

Internal Security Audit — Botium Toys Enterprise

- Defined asset scope and security goals for a simulated enterprise, identifying critical vulnerabilities against the NIST Cybersecurity Framework (CSF).
- Evaluated existing controls against compliance standards (GDPR, PCI DSS) and authored a comprehensive incident report with targeted remediation recommendations.

Automated Access Control System — Python

- Built a Python algorithm to automate IP address allow-list management, reducing manual intervention and human error in Identity and Access Management (IAM) workflows.
- Implemented file handling to read, parse, and filter restricted content against a dynamic remove list of unauthorised users.

MamaPutOnline — Nigerian Food Delivery Website

- Delivered a fully responsive, multi-section food delivery web application using semantic HTML5, CSS3, and vanilla JavaScript as part of a full-stack training programme.
- Implemented mobile-first design, accessibility (ARIA) best practices, CSS custom properties, and JavaScript DOM manipulation — documented publicly via #BiP60 Build in Public challenge.

EDUCATION

B.A. Philosophy — National Open University of Nigeria (NOUN)

In Progress

Full-Stack Web Development Programme

December 2025 – Present | Enugu, Nigeria
